

Today: An introduction to:

BEHAVIORAL ASPECTS OF CRIME SCENES

FRSC 2613

Dr. John P. Mabry
Forensic Science Institute

**This course serves as an
introduction to the art of
behavioral science and
criminal profiling.**

Dr. John Mabry

Dr. Wayne Lord

Former FBI Profilers, FBI Academy, Quantico, Virginia

CRIMINAL PROFILES

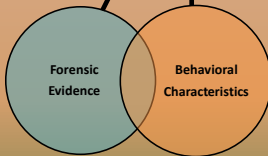

Defined:

An educated guess concerning the behavioral characteristics of an unknown offender. (FBI)

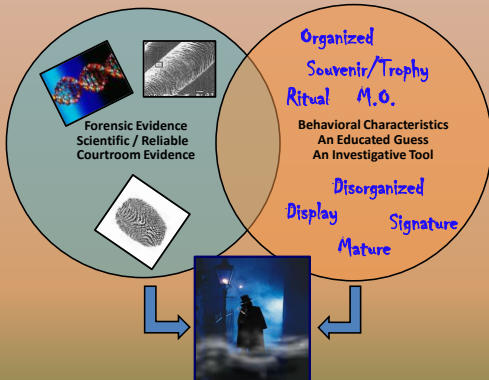

Who Are You ?

Evidence From The Crime Scene Helps Answer This Question

Crime scenes are like art ...

by studying the art, we begin to understand the artist.

What we conclude about the artist - we call a profile !

INDUCTIVE ANALYSIS

A statistical approach to analyzing similar crimes.

Data: The data for these models comes from past crimes, past offenders, friends and associates of the subjects, and investigators.

CRIME 101

CRIME 1-100

96% male
94% white
84% 17-23 years old
92 % acquaintance
88% lived < 2 miles

PROFILE

Male
White
Age 17-23
Acquaintance
Lived < 2 miles
etc.

Suspect Pool

DEDUCTIVE ANALYSIS

A singular scene approach in which the crime scene and physical evidence is analyzed to deduce behavioral characteristics of the unknown offender.

Premise: The physical and non-physical evidence can reveal clues concerning the personality of the offender.

The focus is on the different behavioral characteristics evident in a unique crime scene, and what they **suggest** regarding the offender.

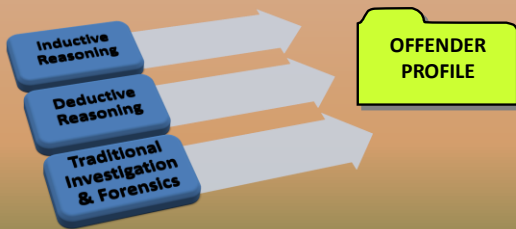

Criminal Investigative Analysis

The process of reviewing and assessing the facts of a criminal act and the thoroughness of the investigation to date. Involves interpreting offender behavior and interaction with the victim, as exhibited during the commission of the crime, and/or at the crime scene, and making suggestions for the continuance of the investigation. In suitable cases, a profile may be generated.

A profile is a product of *Criminal Investigative Analysis*, but not all *Criminal Investigative Analysis* will result in a *profile* being generated.

Profiles are a combination of both inductive and deductive reasoning, and identifying information resulting from traditional investigation and forensics.

WHAT A PROFILE MAY INCLUDE

Offender Profile

Age	Psychological traits
Race	Future behaviors
Sex	Prior stressors
Employment	Post-offense behavior
Proximity	Pre-offense behavior
Religion	Relationship history
Marital Status	Family dynamics
Education	Other unique traits

GOALS OF CRIMINAL PROFILING

1. Provide investigators with possible behavioral characteristics of the unknown offender.
 - To narrow a suspect pool, or
 - If no suspects, focus the investigation on the type of offender police should be looking for.

GOALS OF CRIMINAL PROFILING

2. Suggest investigative strategies and interview strategies.
 - Not all persons react to questioning in the same fashion.
 - Surveillance locations and timing.

GOALS OF CRIMINAL PROFILING

3. Provide investigators with an idea of the types of belongings which may be found in possession of the unknown offender.
 - Many offenders take souvenirs from their crime scenes and victims.

- Jewelry, photos, electronics

LIMITATIONS OF PROFILES

- ✓ A profile is only a tool; it is one of many available to investigators.
- ✓ A profile by itself has never solved a heinous crime.
- ✓ No one has ever been convicted on the basis of a criminal profile alone.

CRIMINAL PROFILES

Remember:

- ✓ A profile is not a substitute for a thorough and complete investigation.

- ✓ Not all cases are suitable for criminal profiling.

CRIMINAL PROFILES

- Not all cases are suitable for criminal profiling.

*Cases suitable for profiling tend to be those in which there is a considerable amount of **interaction** between the offender and the victim.*

CRIMINAL PROFILES

- Not all cases are suitable for criminal profiling.

Principle:

Cases suitable for profiling tend to be those in which the unknown perpetrator has displayed indications of **psychopathology** (abnormal behavior) such as overkill, display, evisceration).

CRIMINAL PROFILES

- Not all cases are suitable for criminal profiling.

Principle:

Cases suitable for profiling tend to be those in which discernable **patterns** are able to be deciphered from the crime scene or where the **fantasy/motive** of the perpetrator is readily apparent.

Found During Search of Subject's Property

Crimes Suitable for Profiling

Suitable:

Serial homicides	Series of rapes
Child abductions	Threat communications
Child murders	Workplace violence
Serial arson	Ritualistic crimes

Not Suitable:

Drive-by shootings	School shooters
--------------------	-----------------

Criminal Profiling is the least scientific thing you will learn in Forensic Science.

Profiling is an ART, not a SCIENCE.

THE HISTORY OF BEHAVIORAL SCIENCE

The FBI Behavioral Science Program

History of Criminal Profiling

- The FBI developed an interest in criminal offender profiles in the 1970's. The **Behavioral Science Unit** was created and located at the FBI Academy.

FBI Academy - Quantico, Virginia

FBI BEHAVIORAL PROGRAM TODAY

THE NATIONAL CENTER FOR THE ANALYSIS OF VIOLENT CRIME (NCAVC)

BAU 1

Counterterrorism;
Arson, Bombing

Terrorism, arson,
bombings.

BAU 2

Threats, Cybercrime,
Public Corruption

Threats, cybercrime,
public corruption.

BAU 3

Crimes Against
Children

Abductions,
disappearances,
homicides and
sexual victimization

BAU 4

Crimes Against
Adults

Homicides, serial
homicides, equivocal
deaths, abductions,
sexual assaults

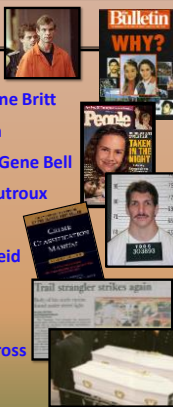

BAU 5

VICAP
Violent Criminal
Apprehension
Program

Featured Cases

- Atlanta Child Murders – Wayne Williams
- Indiana Child and Prostitute Murders – Eugene Britt
- Anchorage Dancer Murders – Robert Hansen
- South Carolina Abductions/Murders – Larry Gene Bell
- Belgium Child Abduction/Murders – Marc Dutroux
- Milwaukee Cannibal – Jeffrey Dahmer
- Nashville Serial Robberies/Murders – Paul Reid
- The Mall Rapist – James Perry
- Polly Klaas Abduction – Richard Davis
- The River Gorge Serial Killer – Arthur Shawcross
- Miami Tamiami Trail Murders – Rory Conde

"There has to be another element that science does not recognize, and that is the concept of evil. Some of these behavior patterns come straight from hell."

Bob Ressler
Former FBI Profiler
