

Trace Evidence

- Fibers
- Hairs
- Seeds
- Feathers
- Soil
- Glass
- Building Materials
- Paint Chips

Glass

- Tempered flat glass
 - Auto windows
 - Shower doors
- Non-tempered flat glass
 - Laminated windshields
 - Architectural windows
- Headlights
- Containers

Glass Identification vs. Comparison

Comparison

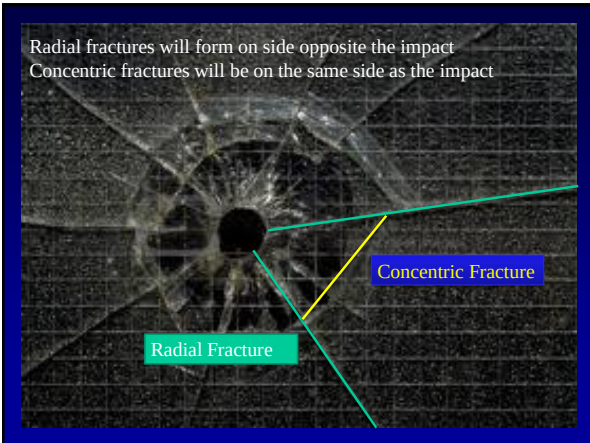

- Physical properties
- Optical properties
- Chemical properties

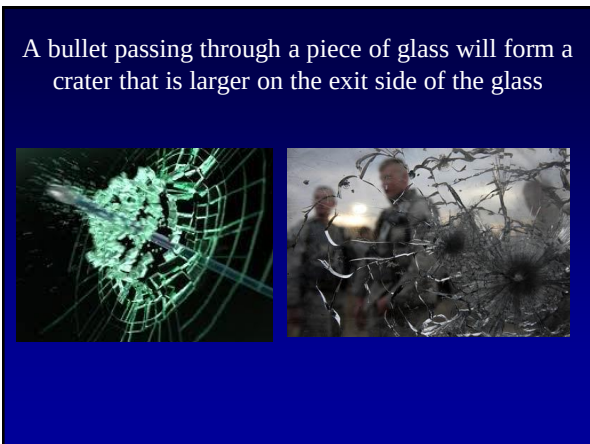

Fracture examinations

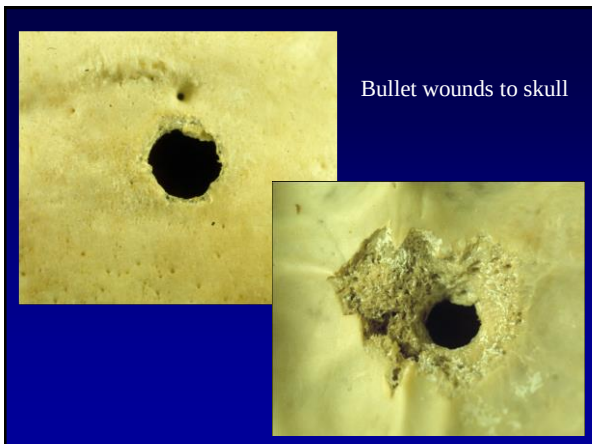

- Physical match = identification
- Impacts - direction of blow

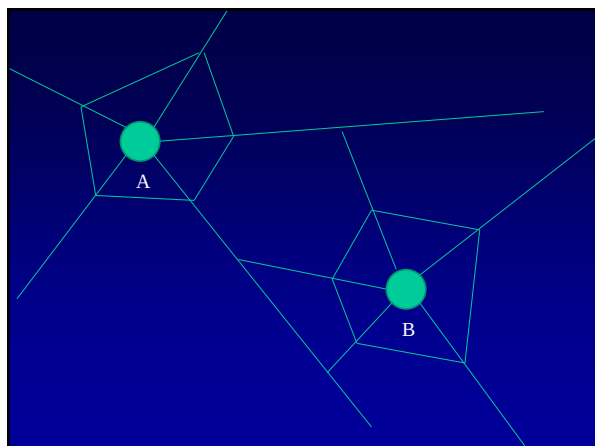

Soil Analysis

A comparison technique to either include or exclude the evidence sample has having originated from a crime scene location

Soil Analysis – class characteristics

Physical properties: soil texture, structure, density

Chemical properties: pH, nutrients

Microscopic: biological organisms
